

Database Project

Project Title:- Computer Company management information system

Team Members:-

Name	Department	Section
1. محمد علي عبد الحميد خسكية	CS	4
2. محمد مبروك معوض محمد	CS	4
3. محمود احمد ابراهيم شواره	CS	4
4.		
5.		

Project Description:-

Computer Company management information system used to convert paper documentation to computer documentation in a computers company that buy PCs , laptops , keyboards , scanners ...

And this company have many suppliers and employees

Normalization

```

```
orders_price.total_item_price
```

```
from customer cu natural join employee em , orders_price ;
```

3 –

create view Item_Suppliers

as

select ITEM_NAME, SUP_NAME ,PHONE,SUP_ADDRESS

from store_item natural join supplier

4 –

create view History

as

select ORDER_DATE ,

CUST_FNAME || ' ' || CUST_LNAME as "Customer Name" ,

EMP_FNAME || ' ' || EMP_LNAME as "Employee Name" ,

ITEM_NAME,ITEM_QUANTITY,ITEM_PRICE,

ITEM_PRICE*ITEM_QUANTITY TotalPrice

from orders,customer,employee,store_item,selled_item

where orders.CUST_ID = customer.CUST_ID and

orders.EMP_ID = employee.EMP_ID and

orders.ORDER_ID = selled_item.ORDER_ID and

selled_item.ITEM_ID= store_item.ITEM_ID

order by ORDER_DATE

Procedures Commands (at least three procedures)

1 -

Create or replace procedure upsalary(id IN number, sal IN number)

Is

neg EXCEPTION;

lrg EXCEPTION;

PRAGMA EXCEPTION_INIT(neg,-02290);

PRAGMA EXCEPTION_INIT(lrg,-01438);

Begin

update job set salary=sal where job_id=id;

exception when neg then

DBMS_outPUT.PUT_LINE('you can not update salary to negative value');

when lrg then DBMS_outPUT.PUT_LINE('error it is very larg value');

End;

2-

create or replace procedure delete_cust(id in customer.cust_id%type)

Is

Begin

Delete from customer

Where cust_id=id;

Exception

When no data found then

Dbms_output.put_line('customer not found');

When others then

Dbms_output.put_line('customer not found');

End;

3-

```
create or replace procedure income (
Odate in nvarchar2 )
--history .ORDER_DATE%type
is
x number(5);
d varchar2(3);
-- User Define Exeption
invaledDate EXCEPTION;
DateNotInDB EXCEPTION;
begin
    d := checkMydate(Odate);
    if (d ='NO') then RAISE invaledDate;
end if;
select sum(TOTALPRICE) into x
from history where ORDER_DATE=Odate ;
if x>0 then
dbms_output.put_line('The Income in ' || Odate || ' Is ' || x);
else
    RAISE DateNotInDB ;
end if;
EXCEPTION
When no_data_found then
Dbms_output.put_line('No date fount');
when DateNotInDB then
dbms_output.put_line('There is no dataFount in ' || Odate );
when invaledDate then
dbms_output.put_line('You Must Enter A Valid Date ');
When others then
Dbms_output.put_line('Error');
```

Functions Commands (at least three functions)

1-

Create or replace function order_price(id IN orders_price.order_id%type)

return number

Is

s number;

Begin

select sum(total_item_price) into s

from orders_price

where order_id=id;

return s;

End;

2-

create or replace function emp_salary(id In employee.emp_id%type , name out
employee.emp_fname%type , jobname out job.job_name%type)

Return number

Is

Total_salary numer ;

Begin

Select concat(concat(em.emp_fname , ' '), em.emp_lname),
(jo.salary+jo.bouns) , jo.job_name into name , total_salary , jobname

From employee em natural join job jo

Where emp_id=id;

Return total_salary;

Exception

When no_data_found then

Dbms_output.put_line('customer not found');

When others then

Dbms_output.put_line('customer not found');

3-

CREATE OR REPLACE

FUNCTION checkMydate(checkDate IN VARCHAR2)

RETURN VARCHAR2

IS

v_result VARCHAR2(3);

v_date DATE;

BEGIN

v_date := to_date(checkDate,'dd-mm-yy');

V_RESULT := 'YES';

RETURN V_RESULT;

EXCEPTION WHEN OTHERS THEN

V_RESULT := 'NO';

RETURN v_result;

END;

4- loggin Function

create or replace function FN (

p1 in users.USER_ID%type,

p2 in users.PASS%type

) return number

is

c1 users.USER_ID%type;

x number;

begin

select USER_ID into c1 from users

where PASS =p2;

if c1=p1 then

return 1;

else

return 0;

end if;

Triggers Commands (at least three triggers)

1-

```
CREATE OR REPLACE TRIGGER display_salary_changes
BEFORE DELETE OR INSERT OR UPDATE ON jop
FOR EACH ROW
WHEN (new.jop_id > 0)
DECLARE
    sal_diff number;
BEGIN
    sal_diff := :NEW.salary - :OLD.salary;
    dbms_output.put_line('Old salary: ' || :OLD.salary);
    dbms_output.put_line('New salary: ' || :NEW.salary);
    dbms_output.put_line('Salary difference: ' || sal_diff);
END;
```

Form 6:

A screenshot of a software window titled "WINDOW1". The window has a dark grey title bar with standard Windows window controls (minimize, maximize, close) on the right. The main content area is a light grey rectangle. Inside this rectangle, on the left, are six text labels: "Emp Id", "Emp Fname", "Emp Lname", "Emp Date", "Emp Phone", and "Jop Id". Each label is followed by a white text input field. To the right of these input fields are four white buttons with black text: "select", "insert", "delete", and "update", arranged vertically. Below the input fields and buttons, there are two more buttons: a grey button with black text "EXIT" and a green button with black text "Home".

Form 7 :

A screenshot of a software window titled "WINDOW1". The window has a dark grey title bar with standard Windows window controls (minimize, maximize, close) on the right. The main content area is a light grey rectangle. Inside this rectangle, on the left, is a label "customer" followed by a horizontal line. Below this line are six text labels: "Cust Id", "Cust Fname", "Cust Lname", "Phone", "Cust Address", and "E Mail". Each label is followed by a white text input field. To the right of these input fields are four grey buttons with green text: "select", "Delete", "Insert", and "UPDATE", arranged horizontally. Below these buttons, there are two more buttons: a grey button with black text "EXIT" and a green button with black text "Home".
